Building and Publishing NPM Packages (w/ CLI App Demo)

Saurabh Daware

What is NPM?

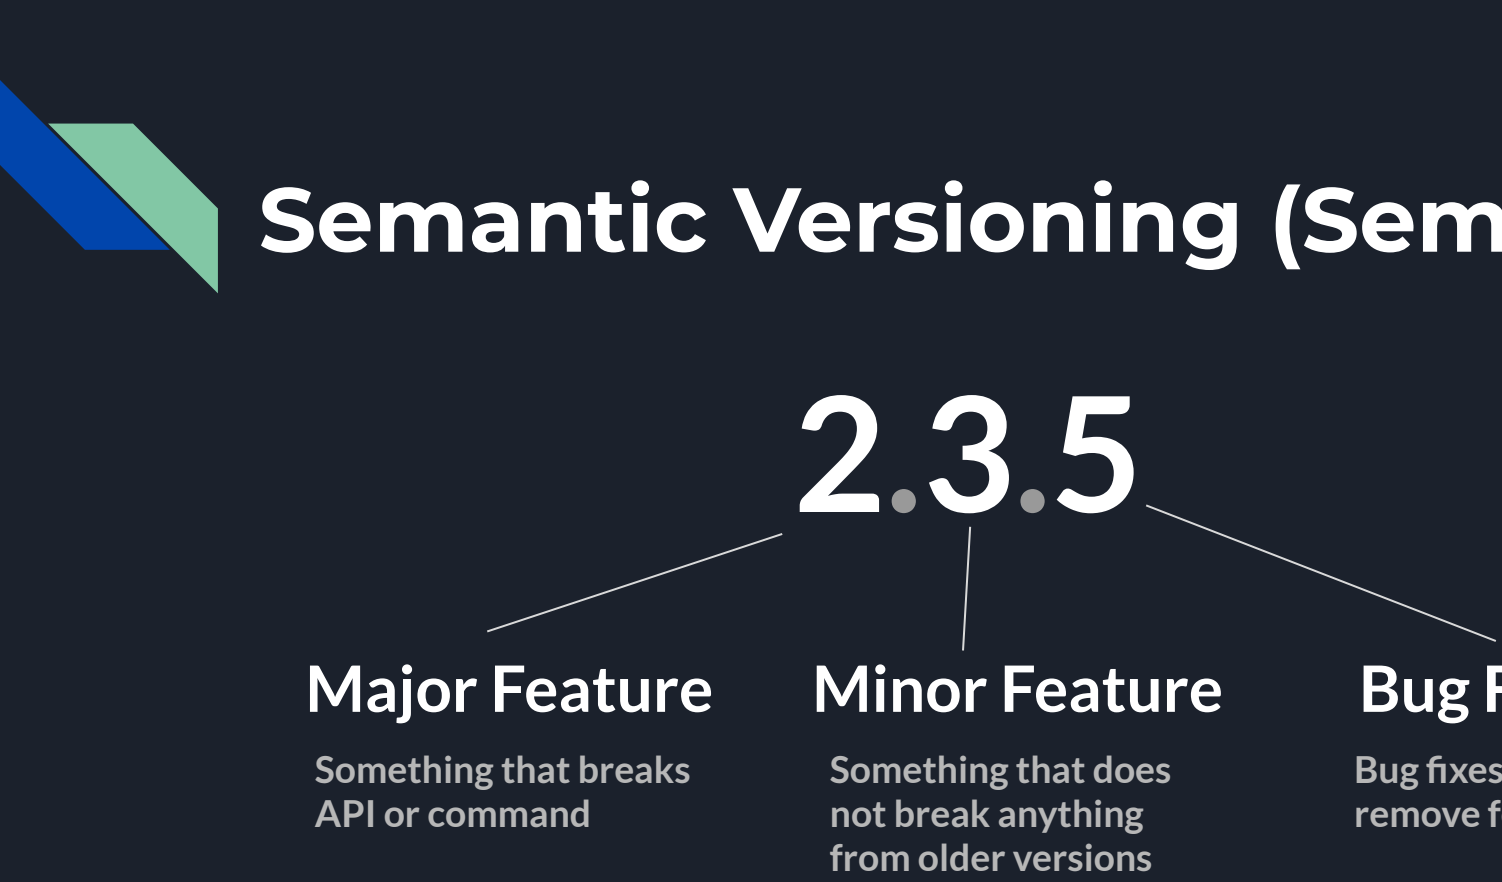
Registry and command line tool

Commands

npm install <package>
npm home <package> | npm docs <package>
npm repo <package>
npm ls
npm ls --depth=0
npm outdated
npm install https://github.com/saurabhdaware/projectman#master

DEMOOOOOOOO!!!

Semantic Versioning (SemVer)



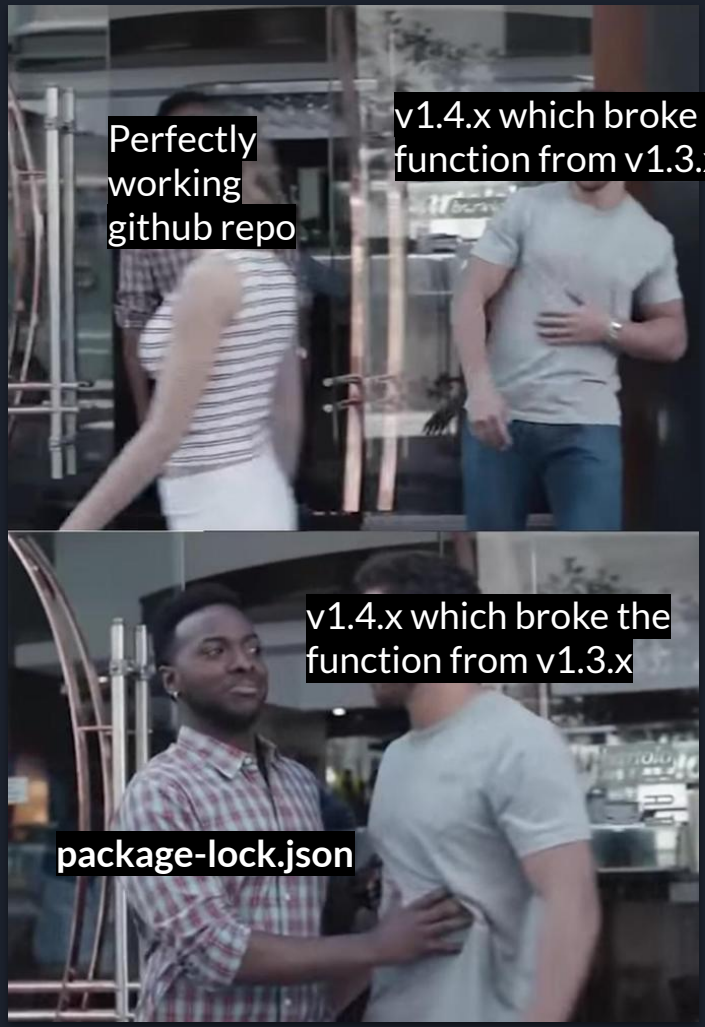
2.3.5-alpha.1

2.3.5-alpha.98921948731948734983

2.3.5-beta.1

2.3.5-rc.1 (release candidate)

2.3.5



Perfectly working github repo
v1.4.x which broke the function from v1.3.x
v1.4.x which broke the function from v1.3.x
package-lock.json

So package-lock is perfect right 💘?

You can’t publish package-lock to registry

npm publish ignores package-lock.json

npm shrinkwrap

npm uninstall --save <package>
